

Press Release

InRoad Consultation Launched

Berne, 03 May 2017

On 2 May 2017, InRoad launched its consultation to collect information about national Research Infrastructure (RI) policies including decision-making, funding and business models and their link to roadmapping processes from EU Member States (EU MS) and Associated Countries (AC). The aim of the consultation is a comparative analysis of national RI policies in order to facilitate engagement, mutual learning and to suggest improved coordination among policy and decision-makers in Europe, thus contributing to RI long-term sustainability.

After an interactive exchange between the consortium partners, the advisory board and the reflection group in Brussels during the [engagement workshop](#) as well as a series of pre-tests with selected RI experts, the InRoad questions for the consultation were established. Due to the complexity of the consultation, the science consultancy [e-concept](#) implemented the consultation technically.

Looking at the project [timeline](#), the launch of the InRoad consultation is the first major project milestone. The deadline for submitting the consultation is Wednesday, 31 May 2017.

Background about InRoad

InRoad is a Horizon 2020 project that aims to contribute to a better harmonisation and synchronisation of priority-setting, funding and lifecycle management of through the exchange of best practices among the main players in Europe. The InRoad consortium includes thirteen partners from eleven countries and includes organisations involved in RI priority-setting and evaluation, RI funding and operators of RI.
